### **DETAILED ACTION**

1. This application is in condition for allowance except for the following formal matters: claim 1 is objected to because of the following informalities:

Regarding to Claim 1, the terms "AO/DI" (see claim 1, line 2) and "PPP" (see claim 1, line 21) in claim1 appear to be a short hand writing for a subject matter and could lead to different interpretations. This terms "AO/DI" and "PPP" should be spelled out explicitly and clearly in English. Appropriate correction is required.

2. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### ***Allowable Subject Matter***

3. Claims 1-3 are allowed.

### ***Examiner's Statement of Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

The prior art along or in combination fails to teach or make obvious the limitations for a witching system connected to Internet for providing an AO/DI service to at least one subscriber terminal, wherein the switching system includes a subscriber switching subsystem that specifically comprises:

"a device controller for reading a packet data stored in the subscriber switching circuit and adding a corresponding subscriber information to the packet data to transmit the packet data in case an AO path set-up is requested from the subscriber terminal, but also for transmitting the original packet data without adding the corresponding subscriber information in case the packet data provided is to be transmitted through a DI path established for the subscriber terminal", and

"a server for requesting the AO path set-up for the subscriber terminal and the DI path set-up for the subscriber terminal in case an amount of data transmitted from Internet exceeds a predetermined threshold, and performing terminal processes of a layer 3 protocol and PPP for the packet data transmitted through the AO path and the DI path" as recited in the independent claims 1.
